Joseph D. Schroers Jr

joeyschroers@gmail.com Richmond,VA 540.290.8138

SUMMARY

Data & Analytics leader with 7+ years of experience delivering enterprise data platforms, analytics products, and cloud solutions. Experienced leading cross-functional initiatives, partnering with business stakeholders, and leveraging Azure, Databricks, SQL, Python, and AI to improve decision-making and operational efficiency.

SKILLS

Enterprise Data Platforms, AI Enablement, Technical Program Management, Data Governance, Data Product Strategy, Agile Delivery, Vendor Management, Cloud Architecture

TECHNOLOGY

Languages: SQL, Python, R, Spark
Cloud: Microsoft Azure, Databricks, Azure Data Factory, Azure Data Lake, Azure SQL, Azure DevOps, GitHub,
Additional Technologies: git, Microsoft Power BI, Tableau, Fabric, Foundry, Purview, Copilot Studio

WORK EXPERIENCE

Altria Group, Inc., Richmond, VA Apr 2023 - Present
Manager - AI Enablement Sep 2025 - Present

- Lead enterprise AI enablement initiatives focused on building scalable, governed, and AI-ready data foundations supporting analytics, reporting, and emerging AI capabilities across the organization.
- Provide technical project leadership across teams of 7–12 engineers, architects, and managed service partners, driving delivery of complex data, governance, observability, and AI initiatives.
- Oversee delivery of enterprise data platform capabilities spanning 5,000+ data assets, hundreds of thousands of pipelines, and nearly 500 curated data objects supporting business-critical use cases across Supply Chain, Manufacturing, Finance, HR, Procurement, Consumer, and Customer domains.

Associate Manager - AI Enablement May 2025 - Sep 2025

- Led enterprise AI readiness initiatives focused on improving metadata, business context, and governance of enterprise data assets to enable AI-driven use cases.
- Directed adoption of Databricks Unity Catalog capabilities by integrating data governance, lineage, ownership, and metadata management practices into enterprise data engineering processes.
- Managed technical delivery across cross-functional teams by developing project plans, coordinating priorities, tracking milestones, and aligning business and technical stakeholders.

Associate Manager - Data Engineering Apr 2023 - May 2025

- Led data engineering initiatives supporting Altria's manufacturing domain, delivering scalable Azure and Databricks solutions integrating production, equipment, materials, MES, and streaming PLC data.
- Managed delivery of an Integrated Business Planning solution that improved visibility into manufacturing operations and provided actionable insights for production planning and decision-making.
- Owned project execution from planning through delivery, including roadmap development, stakeholder management, risk mitigation, and coordination across business teams, engineering teams, and technology partners.

CapTech Ventures, Inc., Richmond, VA Jul 2019 - Apr 2023
Senior Data & Cloud Engineering Consultant

Altria Group, Inc., Richmond, VA Apr 2021 - Apr 2023
Data Engineer

- Developed standardized Databricks solutions using Delta Lake, dynamic logging, and incremental load patterns that improved pipeline maintainability and streamlined future development.
- Automated deployment workflows and enhanced operational monitoring, reducing production risk while improving system reliability and deployment efficiency.

New York State Workers Compensation Board, Richmond, VA / Schenectady, NY Aug 2019 - Apr 2021
Data Analyst

- Served as the primary subject matter expert for four core Workers' Compensation business processes, providing technical leadership on data analysis, business rules, and system functionality.
- Led cross-functional requirements gathering sessions and authored source-to-target mapping documentation to align business objectives with technical implementation.

EDUCATION

Virginia Polytechnic Institute and State University, Blacksburg, VA May 2019
Bachelor of Science - Computational Modeling and Data Analytics
